

[PDF Download] Advances in Motivation Science: Volume 1 Full Book

Book details:

Author: *Andrew Elliot*

Format: *286 pages*

Dimensions: *149.86 x 231.14mm*

Publication date: *25 Nov 2014*

Publisher: *Elsevier Science Publishing Co Inc*

Imprint: *Academic Press Inc*

Release location: *San Diego, United States*

Download

Overview:

Elsevier are proud to introduce our brand new serial, *Advances in Motivation Science*. The topic of motivation has traditionally been one of the mainstays of the science of psychology. It played a major role in early dynamic and Gestalt models of the mind and it was fundamental to behaviorist theories of learning and action. The advent of the cognitive revolution in the 1960 and 70s eclipsed the emphasis on motivation to a large extent, but in the past two decades motivation has returned en force. Today, motivational analyses of affect, cognition, and behavior are ubiquitous across psychological literatures and disciplines; motivation is not just a "hot topic" on the contemporary scene, but is firmly entrenched as a foundational issue in scientific psychology. This volume brings together internationally recognized experts focusing on cutting edge theoretical and empirical contributions in this important area of psychology.

Recommendations:

Table of contents

1. Parochial Cooperation in Humans: Forms and Functions of Self-Sacrifice in Intergroup Conflict

Carsten K.W. De Dreu, Daniel Ballietx and Nir Halevy

2. Affective Consequences of Intentional Action Control

Peter M. Gollwitzer, Torsten Martiny-Hunger and Gabriele Oettingenx

3. Terror Management Theory and Research: How the Desire for Death Transcendence Drives Our Strivings for Meaning and Significance

Jeff Greenberg, Kenneth Vailx and Tom Pyszczynski

4. "Happiness" and "The Good Life" as Motives Working Together Effectively

E. Tory Higgins, James F.M. Cornwell and Becca Franksx

5. Ideological Differences in Epistemic Motivation: Implications for Attitude Structure, Depth of Information Processing, Susceptibility to Persuasion, and Stereotyping

John T. Jost, Margarita Krochika

6. Neurobiological Concomitants of Motivational States

Wendy Berry Mendes and Jiyoung Park

About Andrew Elliot

Andrew J. Elliot is Professor of Psychology at the University of Rochester. He received his Ph. D. from the University of Wisconsin-Madison in 1994. His research areas include achievement motivation, approach-avoidance motivation, the development of motivation and self-regulation, and subtle cue and context effects on psychological functioning. He has been (or currently is) an Associate Editor at *Emotion*, *Journal of Personality*, *Personality and Social Psychology Bulletin*, *Psychological Science*, and *Social and Personality Psychology Compass*, and has edited two handbooks: *Handbook of competence and motivation* (with Carol Dweck) and *Handbook of approach and avoidance motivation*. He has over 170 scholarly publications, has received research grants from public and private agencies, and has been awarded multiple awards for his research contributions.
