Book Synopsis:

Like all educational psychology texts, *Educational Psychology in Canadian Classrooms* covers the six fundamental topics of its discipline: teaching and learning; development (social, moral, and cognitive); individual variability and diversity; motivation; behaviour and classroom management; and assessment. Where this text distinguishes itself is in how it covers these fundamentals: via the Little Red Schoolhouse. The Little Red Schoolhouse is a centralized theme that contextualizes all six major topics, bringing them together in a practical way that is easy for teacher-candidates to understand. Essential to this approach is the narrative's main character, Annette, whose experience teaching a class of students of varied ages, genders, ethnicities, and learning abilities over the course of a full school year draws clear connections between theory and its application in the actual classroom. No other educational psychology text attempts this tightly integrated approach using relevant teacher and student examples, which prepares teacher-candidates for the interesting challenges they will face daily in their educational careers.

This innovative, integrative approach allows authors Alan Edmunds and Gail Edmunds to cover the same amount of material as the competitors in fewer,

easier-to-read chapters and helps both instructors and students make better and more realistic connections amongst the topics. In short, Educational Psychology in Canadian Classrooms is an authoritative guide for teaching teachers how to teach.

Recommendations:

About Alan Edmunds

Gail Edmunds holds a BA Honours in psychology and an MEd in educational psychology. During her tenure as a graduate student she completed two theses focused on children's writing, specifically their ability to revise their own work. Currently a freelance writer and researcher, Gail has also held the title of research officer for the Esso Family Math Project and assisted Professor Alan Edmunds in his research with a precocious child writer. Gail has worked on several educational supplements for US publishers and co-authored with Alan Edmunds the 2008 text Special Education in Canada.

Review quote

"A totally unique approach; combining content and cases in a real-life scenario." --Professor Ken Pudlas, School of Education, Trinity Western University
